

Built-in Systems Interface

C4D4	Boot or rear door sills lighting fault.
F98A	Engine relay unit : fault front right side light.
F98B	Engine fuse box : Front left side light fault.
F98F	Engine fuse box : Front left fog lamp fault.
F990	Engine relay unit : front right fog lamp fault.

Injection/ignition

P0563	Battery voltage fault	
	Properties	
	status	Intermittent
	Characterisation of the fault	Voltage too high
	List of associated variables	
	Engine speed	2168 rpm
	Vehicle speed	32 kph
	Richness regulation status	Closed loop
P0501	Fault : vehicle speed sensor signal	
	Properties	
	Cause	Distant
	status	Intermittent
	Characterisation of the fault	Coherence
	List of associated variables	
	Engine speed	1799 rpm
	Vehicle speed	38 kph
	Richness regulation status	Closed loop

ABS/traction control

P0563	ECU supply overvoltage fault.
	Properties

From.	Local.
status	Temporary
Characterisation of the fault	Not characterised
List of associated variables	
Vehicle speed	11 Kph
Front left wheel speed	11 Kph
Front right wheel speed	11 Kph
Left rear wheel speed	11 Kph
Right rear wheel speed	11 Kph
EBA regulation	Deactivated
EBD regulation	Deactivated
Anti-slip regulation with action on brakes(BASR)	Deactivated
Anti-Slip with action on engine torque disconnected(ASR/ESR)	Deactivated
Anti-engine brake regulation(MSR)	Deactivated
Anti-Slip regulation with action on engine torque(ASR)	Deactivated
Electronic Stability Program(ESP)regulation	Deactivated
ABS regulation	Deactivated
Recirculation pump activated	No
Electric parking brake status	Unspecified status
Status of the "assisted holding" function	Fault
Braking status	No braing in progress
Yaw angle speed	26 ° /s
Transverse acceleration	2.6 m/s ²
Steering wheel angle	56.7 °
Distance travelled since last time ignition switched on	0.2 km
Control unit supply voltage	17.0 V
Braking pressure	0 Bars
Longitudinal acceleration from the wheel speed sensor	-0.08 m/s ²

gearbox

U1313 Incorrect rear right-hand wheel speed transmitted by the ABS/ESP ECU

	Properties	
	From.	Distant.
	status	Permanent fault
	Characterisation of the fault	Not characterised
U1313	Incorrect rear left-hand wheel speed transmitted by the EBS/ESP ECU	
	Properties	
	From.	Distant.
	status	Permanent fault
	Characterisation of the fault	Not characterised
U1313	Vehicle speed transmitted by the ABS	
	Properties	
	From.	Distant.
	status	Permanent fault
	Characterisation of the fault	No signal
	List of associated variables	
	Fault appearance number	3
	Engine speed	2080 rpm
	Turbine speed	1568 rpm
	Automatic gearbox output speed	704 rpm
	Oil pressure	5.35 bar(s)
	Guide pressure	5.4 bar(s)
	Gear engaged	Canging gear
	Converter	Lock-up
	Line pressure modulating electrovalve output	Deactivated
	Position of the gear lever	Position D
	OIL TEMPERATURE	30 °C
	Accelerator pedal position	21.45 %
	Engine torque theoretical CAN	078 Nm
	Control unit supply voltage	18.0 Volt(s)

Power steering electric pump unit

C1208	Fault : vehichle speed ingormation	
	Properties	
	From.	Local.
	status	Intermittent.
	Characterisation of the fault	Short-circuit to positive or circuit open
	List of associated variables	
	Communication error	
C1210	Fault engine running	
	Properties	
	From.	Distant.
	status	Permanent fault
	Characterisation of the fault	Not characterised
	List of associated variables	
	Communication error	

Headlamp height adjuster /directional headlamp

C1142	Front vehicle height sensor signal
B1117	Supply voltage too high

Engine relay unit

F98A	Fault : front right side light
F98B	Fault : front left side light
F98F	Fault IHF front foglamp
F990	Fault rHF foglamp
